學經歷

Education

2000 – 2005	Ph.D., Department of Life Science, National Tsing Hua University
1994 – 1996	M.S., Graduate Institute of Microbiology and Immunology, National Defense Medical Center
1990 – 1994	B.S., Department of Medical Technology, China Medical College

Research experiences

2015	Professor, Department of Microbiology and Immunology, Chang Gung University
2013	Professor, Department of Microbiology, School of Medicine, China Medical University
2011	Assistant Professor, Department of Urology, The University of Texas Southwestern Medical Center
2005	Post-doctoral fellow, Infectious Disease Control and International Medicine, Niigata University, Japan

研究方向(Research Description)

1. Infection and immunity

Our current studies are focused on the investigation of molecular mechanisms of several bacterial components that involved in bacteria-induced pathogenesis of host. We have explored certain virulence factors that have been shown to be involved in the immune response caused by *Helicobacter pylori*. In addition, the functional studies of cytolethal distending toxin (CDT) secreted from *Campylobacter jejuni* as well as its theranostic application are currently studying in our laboratory.

2. Cancer biology and translational medicine

Seventy thousand patients were diagnosed with cancer in Taiwan every year. We have investigated some potent drugs against several types of cancers and explored their molecular mechanisms. The aims of discovery novel agents for inhibiting tumor cells are developing and characterizing in our laboratory. Furthermore, we recently have been collaborated with physicians for the research of translational medicine. Our research interests including gut microbiota, infectious diseases, and cancer biology, which have been established in our collaborative teams.
